SKILLS

- Go | TypeScript | JavaScript | Java | Node.js | Express.js | React
- PostgreSQL | Kafka | Redis | MongoDB | go-chi | pgx | sqlc | mockery | Prometheus | Grafana
- REST | gRPC | Webscoket | CI/CD | Docker| Git | Swagger | Elasticsearch | Kibana | Alertmanager

EXPERIENCE

Senior Full-stack developer | <u>Invitro IT</u>   remote, **Feb 2022 - Sep 2024**

- Designed and implemented internal microservices and frontend applications for the largest medical company in the Commonwealth of Independent States, with **a daily turnover exceeding \$2 million**, using Go, TypeScript.
- Developed an internal gRPC authentication service utilizing JWT tokens.
- Rewrote several microservices to transition a legacy project based on Java 8 and Spring Boot to Go.
- Established an API gateway in Go for the company's main internal project, simplifying integration with other services and clients.
- Configured bundlers and optimized the application's code, resulting in **an 80% improvement in performance and reduced load times**.
- Integrated monitoring and error tracking services (Sentry.IO, Elasticsearch, Prometheus, Alertmanager, Grafana) for internal applications.
- Implemented unit tests and end-to-end tests to ensure comprehensive test coverage for the projects.
- Integrated Continuous Integration/Deployment pipelines using Docker and Kubernetes.
- Lead a frontend team of 5 members on internal products, mentored junior developers, and assisted teammates in enhancing their skills; handled merge requests and code reviews, and actively participated in the hiring process.

Senior Frontend developer | <u>Noveo Group</u>   Cyprus, Limassol, remote, **Oct 2021 - Dec 2022**

- Contributed to the outsourced development of commercial projects, involved in both the creation from scratch and integration with legacy projects.
- Designed and developed chat and planning modules and B2B application for social activities.
- Created a comprehensive design system with Storybook documentation.
- Collaborated closely with Node.js developers to ensure the development of well-designed products.
- Organized unit and end-to-end testing in the project, resulting in a reduction of software defects.
- Managed team members, actively participated in scrum activities, provided consultation to colleagues, and evaluated risks.

Frontend developer | <u>NORD CLAN</u>   Russia, Saint-Petersburg, **Sep 2020 - Oct 2021**

- Migrated a legacy frontend application from jQuery to React and Redux, resulting in reduced loading times and improved user experience.
- Developed a single-page application for a medical/healthcare company from scratch.

EDUCATION

2016–2020	Bachelor of Engineering at **Saint Petersburg Mining University**	(GPA: 4.7/5.0)
2013–2016	Mathematics Degree at **AG SPSU — Academic Gymnasium**	(GPA: 4.8/5.0)
